

Coextruded films

Producing 3-layered films on our coextrusion line enables us to use a different material for each layer, resulting in combination of different film properties such as slip/non-slip, UV stabilization, adhesive and sealing properties, colouring and others. This gives us a possibility to find appropriate solutions for the most demanding clients from food and chemical industry, agriculture, construction industry and more. Up to eight colour high quality flexo-print improves end customer value even further. Coextruded films are also used and sold as an input in production of laminated films.

Coextruded films

Material:	LD/EVA/LD, LD/LDRG/LD, LD/MET/LD, HD/HD/LD, PP/LD/LD etc.
Colouring:	Schulman scale
Type:	film
Film width:	600 mm - 4.000 mm
Film thickness:	8 my - 200 my
Tube:	76 mm

Characteristics:

- excellent barrier properties
- different material combinations
- suitable for most demanding packaging purposes
- consistent quality control
- guaranteed traceability for each roll (control number)

Economical

Eco friendly

Tear resistant
