

Charatcteristics:

- appealing outlook of packaged items
- possibility of microperforation
- many perforation types
- 8 colour flexo-print
- consistent quality control
- guaranteed traceability for each roll (control number)

Polypropylene films

We offer micro-perforated bi-orientated polypropylene films, sealable on both sides, for packaging of bread and other bakery products. Polypropylene is used for its outlook and barrier properties, whereas micro-perforation helps to lead off excessive moisture. According to client's demands, all the films can be printed.

PP films

| | |
|-------------------------|---|
| Material: | BOPP, PP cast |
| Print: | 8 colour flexo-print |
| Heat micro-perforation: | spacing 3,1/9,7 mm, perforation diameter 1mm |
