

Printed laminates

A response to ever increasing demands for improved barrier properties and growing environmental concerns, our printed laminates are the best way to extend shelf life and enhance outlook of your products. We offer solvent-free lamination of up to four different materials (PP/PE, PET/PE, PA/PE, PP/PP, PP/AL/PE, ...), with maximal laminating width of 1.300 mm. Films can be flexo-printed in up to 8 colours. Furthermore, we also do paper printing. For the highest quality requirements of our clients digital CTP plates are used. Our printed laminates are suitable for different applications and industries such as food industry (packaging of sugar, noodles, rice, coffee, animal food, deep frozen food, crisps, prepared meals, sweets etc.) washing powder industry, paper industry, pharmaceutical industry, chemical industry. and many others.

Characteristics:

- excellent barrier properties
- lamination of different materials
- suitable for most demanding packaging purposes
- highly resistant sandwich print
- wide application
- paper printing
- consistent quality control
- guaranteed traceability for each roll (control number)
